Delphinix Systems Co.,Ltd

In this information age majority of businesses involve in the creation, distribution and application of the information. The use information generated throughout the organization such as in the front line, back end as well as in the executive suite. Therefore, most of the businesses today utilize technology to rethink conventional business practices, speed up the routine activities, reengineer business structure, and so on.

Every business today is challenged to create operational efficiency among the hundreds of IT technologies, business processes, partners, and customers. The goal is to connect flexibly the elements of the business supply chain.

Your business relies on communication. Using the internet and web infrastructure as platforms. Web services seamlessly connect operations, business processes, customers, and suppliers anywhere in the world. We need rapid e-business development solution with web services to keep in touch.

We ensure the transfer of know-how to your IT team or we can assist you to implement IT infrastructure to your business operation.

Delphinix Systems Co., Ltd. Managed by Jirayu Wiriyaiphibool. He was an advisor and consultant for U.S. Embassy Bangkok and United Nation (FAO) Thailand.
